Abstract

One principle runs through it all. The party organizations at all levels in China have conscientiously implemented Xi Jinping's new socialist ideology with Chinese characteristics and consistently promoted the strict administration of the party. This has set the direction for the specific requirements of Party building in the Grass-roots party organizations at colleges and universities. Grassroots party organizations in Colleges and universities are the main positions of the party in Colleges and universities, which play an important role in cultivating and shaping outstanding young Party members. They shoulder the historical responsibility of developing the cause of socialism with Chinese characteristics, building a socialist modern power in an all-round way, and realizing the Chinese dream of the great rejuvenation of the Chinese nation. Therefore, we should gradually promote and implement grassroots party organizations with stricter standards and higher requirements. The main responsibility of the construction of the party organization is the only way for the reform of higher education, and it is also the inevitable requirement for higher education to develop better. This paper starts with the current situation of the implementation of the party's main responsibility and the corresponding countermeasures to the existing problems, and deeply analyzes the relevant functions of the Grass-roots party organizations in Colleges and universities and the role they should play.

Keywords

Colleges and Universities; Grassroots Party Organizations; Seeing Party Self-governance Exercised Fully and with Rigor; Subject Responsibility.

1. Introduction

In the party building work of the Grass-roots party organizations in Colleges and universities, the full implementation of the main responsibility of strictly administering the party is a very important link in the teaching and daily party building work of colleges and universities, which is directly related to the quality of the overall party affairs and Party building work in Colleges and universities. The ideological and political education of Grass-roots party organizations in Colleges and universities is particularly important. The normal operation of Grass-roots party organizations in Colleges and universities also has great practical significance to maintain the stability of national social development and campus security.

2. Organization of the Text

2.1. The Main Reasons for the Implementation of the Overall and Strict Party Main Responsibility of the Party Organizations at the Grass-roots Level in Colleges and Universities

2.1.1. The Ideological and Political Foundation Needs to be Improved

In the process of learning Xi Jinping's socialist ideology with Chinese characteristics, we should further set up the direction of China's socialist ideology. On the one hand, the study of the party's theoretical knowledge is not systematic and solid enough. At present, in the aspect of theoretical study, there are more concentrated study in groups, less personal study alone, insufficient study in original works, original texts and principles, and insufficient ability to understand the essence. On the other hand, in the process of higher education, the party's theoretical knowledge and practical ability is still not enough. The grassroots party organizations themselves are generally lack of initiative and planning. They are not thorough enough to understand the spirit of Xi Jinping's new socialist China thought and Xi Jinping's important speech.

2.1.2. There is a Gap between Political Function and Self Construction

The leading cadres of Party members in Colleges and universities fail to use their own political functions well. The leading cadres of Party members in Colleges and universities should focus on taking on the party's political responsibility and political concept and play a leading role in the party. Especially, the requirements of the Central Committee of the party that "we should take the political construction of the party as the primary leader and run the political requirements and political standards throughout the ideological, organizational, style, discipline and system construction of the whole party", the leading cadres of Party members still have problems in political function such as insufficient political consciousness and insufficient political ability; in the aspect of personal ideological construction, there are some problems such as the cognition of party spirit The problems that are weak and the aim concept needs to be consolidated.

2.1.3. The Implementation of the New Development Concept Needs to be Further Deepened

In the work practice, the study of new practical theory and the exploration of the reasons still need to be strengthened, and there are still habits of thinking about problems and doing things based on experience, which leads to the lack of vision and ideas and methods in the specific work. Through studying the important speech of general secretary Xi Jinping at the Northeast Revitalization Symposium and the important spirit of his visit in Liaoning, combined with the problems of insufficient management reform and development in universities, inadequate implementation of important speeches and inadequate initiatives, we need to further improve our development ideas, broaden our development channels, innovate development initiatives, and pool intelligence power.

2.1.4. The Relationship between Party Members and Grassroots is not Close Enough

We must make great efforts to connect with the Grass-roots masses and stand on the basis of the masses' standpoint. In the process of promoting the work and life of the party organizations at the Grass-roots level in Colleges and universities, while seeking development and rejuvenation, we should put the people at the center of their thoughts, listen to the opinions and voices of the masses, and firmly grasp the basic situation. On the one hand, the listening to Grass-roots opinions is still insufficient. The party's mass line is not fully understood, especially the awareness of adhering to the reform of the basic people's outlook on life, world outlook and values is seriously inadequate, and the working experience in close contact with the masses is also seriously insufficient. The members of the leading group have not integrated the purpose

of serving the people wholeheartedly into the thought and action, which leads to the emergence of individualism and formalism. In addition, the party members have not integrated the purpose of serving the people wholeheartedly into their thoughts and actions, which leads to the emergence of individualism and formalism. Less consideration is given to serving the people. Second, the basic work method is relatively simple. The activities of the Grass-roots party organizations are not innovative enough, and there is still a great improvement space in the ability of doing the mass work well. The basic needs of the masses need to be paid more attention to and solved. The party organizations at the Grass-roots level in Colleges and universities should constantly improve and reform, and move the mass work to a new level.

2.1.5. The Sense of Honesty and Discipline should be Further Deepened

The leading cadres of Party members at the Grass-roots level still need to work hard in terms of honesty and discipline. Grassroots party members and cadres in Colleges and universities should strictly abide by and effectively implement the relevant provisions of the party, fully implement the eight provisions of the Party Central Committee and the system of "one post and two responsibilities", normalize and regularize the education activities of party spirit, Party style and Party discipline, strictly self-discipline in work and life, constantly carry out self-criticism, build a new line of defense against corruption and change, and maintain a clean ideological and political education foundation. We should continue to put the party's discipline and laws and regulations in the front, strengthen daily supervision and management, strengthen the supervision of important fields and important work links, further correct the direction of power operation, and root the values of honesty in the construction of Party organizations in Colleges and universities.

2.2. An Analysis of the Reasons for the Implementation of the Main Responsibility of Comprehensively and Strictly Administering the Party by the Grass Roots Party Organizations in Colleges and Universities

2.2.1. Ideological Understanding

There is a lack of deep understanding and understanding of Xi Jinping's theory and practice of China's socialism with Chinese characteristics. For China's deep understanding of China's founding of thought, there are still some errors in the theory of strengthening the party, and the understanding is too simple. For the mass stand in the new era of Xi Jinping's socialism with Chinese characteristics, the mass viewpoint is not deep enough, and there are some deviations in how to effectively use Xi Jinping's new socialist ideology with Chinese characteristics. "There is still some room for the understanding of the party organization, and there is still a long way to go to achieve the integration of learning, thinking and practice.

2.2.2. Political Position

Their own political position still needs to step up to a new level again, and their political consciousness also needs to be improved. The "Four Consciousness", "four Self-confidence" and "two maintenance" have not been fully promoted to the height of fundamental political standards and political requirements, and have not been effectively implemented. In the work of Grass-roots party organizations in Colleges and universities, the focus on the party's political attribute, political goal and political pursuit is one-sided, and the efforts in the implementation of the work are not in place. The awareness of maintaining the party's political ecology as the command and putting political standards and requirements into the daily work of the college is not clear, and the implementation work is not active enough. The idea of how to understand the problem, solve the problem and lead the development from the political perspective is lack of certain implementation. The understanding is too one-sided and idealistic. The political responsibility and political courage in the implementation of the idea still need to be improved. The members of the leading group did not effectively integrate the original intention and

mission of the Communists into the political construction, had too loose attitude in strictly abiding by the political standards, and did not really lead the educational reform and development of the Grass-roots party organizations in Colleges and universities with solid political foundation and excellent political quality and ability.

2.2.3. Style of Party Members

We need to deepen our understanding of the extreme importance of style building, take few measures to correct the "four styles", lack of self-consciousness in facing up to our own problems, lack of courage in self revolution, and fail to persevere in promoting the party spirit and style building of Grass-roots party organizations in Colleges and universities, so as to make the work less effective and lack of enough responsibility for the work Consciousness, lack of due work, entrepreneurial spirit. In addition, the basic purpose of realizing, maintaining and developing the broadest masses of the people has not been integrated into the daily work of the Grass-roots party organizations in Colleges and universities. There are some misunderstandings about the party's policies. In the process of practicing the basic purpose of the party, there are often slack attitudes, and there is no deep-rooted mass viewpoint and mass line in the mind, Lack of effective practical action. They have not made enough efforts to effectively solve the interests that the masses are most concerned about, have not made enough energy and effort to enhance the trust and confidence of the masses in the party, lack the consciousness and sense of responsibility to the masses, and lack the initiative and enthusiasm to serve the people wholeheartedly.

2.2.4. Personal Ability

The awareness of serving teaching, scientific research and teachers and students is not strong enough. The ability of how to properly use the latest theoretical achievements of the party to analyze and solve problems needs to be strengthened. There is not enough ability and quality to plan for the future, scientific development, correct decision-making and implement.

2.2.5. Honest and Clean

We should thoroughly and strictly enforce the party's political discipline and rules, and conscientiously implement the political responsibility and task of governing the party. On the one hand, we need to strengthen the daily management, strengthen the monitoring of important areas and key links of the college, and standardize the operation of power. In particular, the main leaders of the party and government work in each college should actively take the lead in implementing the responsibility and obligation of "one post, two responsibilities", and actively implement the system of leading cadres' honesty, so that leading cadres can live in a supervised and constrained working environment and make them successful For habit. On the other hand, the discipline education in the work and life of Grass-roots party organizations is not targeted enough, the education of Party Constitution, party rules and Party discipline is not enough, and the promotion of long-term and repeated learning of key contents such as the code of integrity and self-discipline and disciplinary regulations is not enough. Third, the daily management and supervision system of Party members still need to be further improved. There is a lack of practice and application of "four forms" of supervision and discipline, and the good habit of supervision and conscious supervision has not been formed. We should establish the system and standard for the important fields and key links of the college, strengthen the behavior management, and comprehensively manage people and affairs according to law in the actual work.

2.3. The Countermeasures of Implementing the Overall Strict Party Main Responsibility in the Grass-roots Party Organizations of Colleges and Universities

2.3.1. Adhering to the Systematic Ideology of Xi Jinping's New Socialist Theoretical System with Chinese Characteristics, Firmly Carrying out the Spirit of General Secretary Xi Jinping's Important Instructions and Instructions, Strictly Observing the Decisions Made by the Central Committee of the Party, Deeply Studying the Nineteen Spirits of the Party, Firmly Establishing "Four Consciousnesses" and "Strengthening the Four Self-confidence" and "Achieving" by Taking Concrete Actions in China. Two Maintenance "

On the one hand, China's socialist ideology with Chinese characteristics has been constantly strengthened in Xi Jinping's new era. We should strengthen and improve the progress of the party's theme education, further guide and educate Party members and cadres to understand, keep and practice their original intention, persist in continuous comprehensive and systematic learning, pay attention to the normalization and long-term effect of theoretical arms, and promote the high-quality development of the work of Grass-roots party organizations with the improvement of theoretical level and ideological understanding.

On the two hand, the Grass-roots party organization workers should start from their own initiative and consciously follow the general secretary Xi Jinping as the core of the party's loyal followers and practitioners. Carrying out the spirit of instructions and instructions of general secretary Xi Jinping, linking the actual situation of colleges and universities, closely linking the overall requirements and deployment of the central and provincial committees on deepening reform and innovation education in Colleges and universities, constantly innovating ideas, finding improvement methods, and improving the reform system. Adhere to the problem orientation, embody the responsibility, consolidate the party's theoretical achievements, and earnestly plan new measures for the reform and development of Grass-roots party organizations from a higher position, a broader vision, and a longer vision.

In three aspects, we should implement the basic idea of comprehensively and strictly governing the party, firmly grasp the party construction as the first work, consciously put the construction of Grass-roots party organizations at the center of our work, and fully realize the importance and necessity of Party Construction for the work of Grass-roots party organizations in Colleges and Universities. We should focus on strengthening political construction, grasp the correct political principles and direction in teaching and scientific research, establish the working thinking of common progress, and transform the construction of Grass-roots party organizations from single to whole. The leading groups of schools and colleges should actively promote high-quality development in accordance with the development strategy of education in the new era determined by the Fifth Plenary Session of the 19th CPC Central Committee.

2.3.2. We should Strictly Abide by the Party Constitution and Rules, Firm our Great Ideals, Maintain a Good Style of Work, Standardize our Behavior, and be Aware of Awe, Guard Against Fear, and Keep the Bottom Line

On the one hand, always put the party's political leadership in the political leading position of Grass-roots reform and development. We should implement the opinions of the Party Central Committee on the Grass-roots work of Party organizations in Colleges and universities, and comprehensively implement the political standards, positions and requirements to the specific actions of Grass-roots party organizations, Party members and cadres. Party members and leading cadres in Colleges and universities should play a leading role, deeply understand and study the ideological concept of "two four, one two", always remind themselves to maintain a high degree of unity with the Party Central Committee in thought and action, ensure their own political responsibility, control their own political direction, and enhance their own political

ability. To cultivate a good political ecological environment for Grass-roots party organizations in Colleges and universities and create a clean and pragmatic working atmosphere.

On the other hand, we should do a good job in the construction of party conduct and clean government of Grass-roots party organizations, implement the principles and regulations of Party members' integrity into the training activities of schools and colleges, guide Party members and cadres to gradually strengthen their sense of self discipline, integrate the education of clean government and warning into the training content of Party members, and deepen the education of Party members into their daily educational life. Starting from the key links of the school, we should strengthen supervision and self-supervision, constantly standardize the operation of power, adhere to strict discipline and accountability, resolutely put an end to all violations of discipline and law, and provide strong guarantee for the development of Grass-roots work with iron discipline.

2.3.3. We should Firmly Establish the Sense of Purpose, Closely Contact and Unite the Masses, Actively Respond to the Masses, and Promote the Continuous Improvement of the Level of Serving the Masses with the Masses' Views, Positions and Feelings

We should further expand the channels of close contact with the masses, implement the requirements of building the party for the public and assuming power for the people into our practical work, consciously consider and arrange all kinds of work from the needs of the masses, truly make people friendly, love the people and benefit the people in our daily practical work, and strive to solve the interests of teachers, students and employees clearly. We should continue to act to fully implement the system of socialism with Chinese characteristics in the new era, adhere to the combination of collective and individual, constantly promote the improvement and implementation of the party's work rules and regulations, start from the foundation, discuss and research work, give full play to democracy, speak freely, and actively play the role of wisdom and strength of the grassroots.

3. Conclusion

There is still a big gap in the actual implementation of the main responsibility of strictly governing the party in the Grass-roots party organizations in Colleges and universities, which is mainly reflected in the following problems: the ideological awareness of Grass-roots party members in Colleges and universities needs to be improved, the political literacy needs to be strengthened, the new development concept needs to be deepened, the contact with the masses is not close enough, and the sense of honesty needs to be improved. Therefore, if we want to strengthen the comprehensive implementation of the party organizations at the Grass-roots level in Colleges and universities to strictly govern the party, the party organizations at the Grass-roots level in Colleges and universities should start from the above problems, persist in arming their minds with new ideas of the new era, improve the basis of ideological and political theory learning, strictly abide by the party's discipline, maintain a good style of work, and effectively play an important role of the party organizations at the Grass-roots level in Colleges and universities.
